

| BCA Recipe Card - Must meet TWO of THREE categories: | | | |
|---|---|--|--|
| Final E/M Code | Problems: Number/Complexity | Data: Amount/Complexity | Risk of Complication |
| Straightforward 99202 (15-29 mins) 99212 (10-19) | 1 self-limited or minor problem | None | None Rest, Employ Coping Skills |
| Low 99203 (30-44 mins) 99213 (20-29 mins) | <ul style="list-style-type: none"> •2+ Self-limited or minor illness •1 Stable chronic •1 Acute uncomplicated illness | Limited: 1 of 2 data categories required <ul style="list-style-type: none"> •2 Unique tests or documents OR •1 Independent historian assessment | Low <ul style="list-style-type: none"> OTC Meds Psychotherapy |
| Moderate 99204 (45-59 mins) 99214 (30-39 mins) | <ul style="list-style-type: none"> •1+ Progressing chronic, exacerbation or treatment SE •2+ Stable chronic •1 Undiagnosed new problem •1 Acute illness w/systemic symptoms | Moderate: 1 of 3 data categories required <ul style="list-style-type: none"> •3 Unique tests, external notes from unique source or ind historian assessment •Test interp not separately reported by clinician •Mgmt discussion or test interp w/external clinician/appropriate source | Moderate <ul style="list-style-type: none"> •Rx drug mgmt •SDoH significantly limiting dx or mgmt |
| High 99205 (60-74 mins) 99215 (40-54 mins) | <ul style="list-style-type: none"> •1+ Chronic illness w/severe exacerbation or treatment SE •1 Acute or chronic illness posing a threat to life/bodily function | Extensive: 2 of 3 data categories required <ul style="list-style-type: none"> •3 Unique tests, external notes from unique source or ind historian assessment •Test interp not separately reported by clinician •Mgmt discussion or test interp w/external clinician/appropriate source | High <ul style="list-style-type: none"> •Intensive monitoring for drug therapy for toxicity •Decision regarding hospitalization •DNR or de-escalation of care d/t poor prognosis |

This coding tool is based off of AMA guidelines as published in CPT© 2024 Professional Edition. This card is intended to be used as a quick reference tool. Please see AMA guidelines for full details. Training on the use of this tool is available from BCA, Inc. Please visit us at www.bcarev.com

<-----Fold Here----->

| Psychiatric Services with Medical Consideration <i>Use when provided by MDs, DOs, NPs & PAs</i> | PDE with medical consideration | Allowable Activities for Time-Based Coding |
|---|--|--|
| C Psychiatric Diagnostic Evaluation (PDE with medical consideration) | 90792 | Must be on date of service, may be face-to-face or other Review of lab/test result, consult note, discharge summary Obtaining history, reviewing separately obtained history Time spent on medically necessary exam and/or evaluation Education or counseling of patient/family/caregiver Order labs, xrays, other diagnostic tests or procedures, meds Referral/Communication with other health care professionals Clinical information documentation in the EMR/health record Independent Results Interp: results/communication to patient/family/caregiver Coordination of care not separately reported Reminder: Don't count time by ancillary staff, resident or student, time on another DOS or procedure time Note: Time spent performing separately reported services, e.g., procedures, EKGs, chronic care management activities, etc. cannot be counted towards total visit time. |
| PDE Documentation Tips: Document who referred and why; CC, HPI, history, [psych, social & family hx] and, appropriate medical hx. Include also, strengths, coping skills, resources, support systems. Include also MSE, formulation; Include all Dx that require or affect care. Include treatment plan. Include goals with timeframes, your expectations and patient instructions. | | |
| D Psychotherapy w/medical management (choose for time > 16 mi.) | Document therapy time | |
| These psychotherapy codes must be coded with a qualifying E/M code. Documentation: Reason for visit and changes since last visit; Identify psychotherapy modalities/techniques used today; note MSE/observations. Assessment include dx for med. mgt., all diagnoses evaluated, treated, and that affect your care today; Include today's status of problem(s). Include also progress toward goals, changes in treatment plan, and follow-up. | <ul style="list-style-type: none"> + 90833 16-37 minutes + 90836 38-52 minutes + 90838 53 or > minutes | |
| E Interactive complexity (add with appropriate documentation) | + 90785 | |
| <i>May use with codes above for increased work intensity today, if documentation supports:</i> <ol style="list-style-type: none"> 1 Manage maladaptive behavior which complicates delivery of care today - or 2 Caregiver emotions/behavior interfere w/implementation of treatment plan - or 3 Need to initiate sentinel event discussion...mandated report to 3rd party - or 4 Use of play equipment, devices, interpreter to overcome barriers to interaction | | F. Psychotherapy for crisis 90839 (if 31-60 min) Typically life threatening + 90840 addl 31 min Requires urgent assessment, pt in crisis, must work to restore safety, must devote full attention to patient, cannot provide any other services during counted time frame. Document presentation, need for urgent eval, MSE and other components. Include your time mobilizing resources to diffuse crisis. Report only once per day, even if time is not continuous (cumulative total of all time on DOS). |
